

Arion Mag

Arion Mag

Control, stability, and freedom in a single roller.

Arion Mag is a classic roller equipped with **three levels of magnetic resistance**. The three parabolic rollers help you hold your line, the adjustable magnetic resistance adds **variability to workout intensity**, and the **foldable structure** reduces bulk when stored.

Suitable for road, gravel, and MTB, **Arion Mag** is solid, effective for training, and easy to use.

Stable, lightweight structure

Made of glass-fiber-reinforced polyamide, the **Arion Mag** frame combines **low weight with strength**. Its eight contact points deliver optimal stability during training, even in more intense sessions. The essential design removes superfluous elements to focus on function and long-term durability.

Parabolic rollers for natural control

The three rollers—85 mm diameter at the center and 100 mm at the ends—guide the wheel toward the middle, helping you hold your line. This design **supports balance and improves pedaling technique**. The antistatic material **reduces noise and tire wear**, while sealed bearings ensure lasting smoothness with no maintenance.

Lightweight, compact, and foldable

The **Arion Mag** structure can be **folded 180°**, significantly reducing its footprint. This makes it easy to store in limited spaces and convenient to transport thanks to its **7.8 kg weight**—a practical solution for optimizing space without sacrificing an effective workout. A **shaped step** is integrated into the structure, making it easier and safer to mount and dismount the bike—especially useful with higher road frames. This detail enhances usability day to day.

Adjustable magnetic resistance

Arion Mag features integrated magnetic resistance with three manually selectable levels.

This function lets you customize your training:

Level 1: ideal for agility drills and warm-ups.

Level 2: suited to steady-paced sessions on flat terrain.

Level 3: perfect for simulating climbs or low-cadence strength work.

Neodymium magnets ensure progressive, smooth resistance, delivering a natural pedaling feel.

Can also transmit training data

With the optional **Misuro B+** sensor, **Arion Mag** can transmit data via **ANT+™** and **Bluetooth Smart®** to **My E-Training**, Elite's app designed to structure and manage indoor cycling workouts.

The sensor detects **speed** and calculates **cadence**, transmitting the data wirelessly via **ANT+™** and **Bluetooth Smart®**. Using the **My E-Training** app also allows you to access power data during your workout, with no additional sensors required beyond the **Misuro B+ sensor**.

When paired with **external power sensors**, **Arion Mag** can also be used with all other available training apps, such as **Zwift**, **MyWhoosh**, **Rouvy**, **Kinomap** and more, while keeping **manual control of the resistance levels**.

Features

Home Trainer Type	Magnetic roller (non-interactive) with manual selector of the resistance level.
Power Meter	220 Watt (20km/h) - 520 Watt (40km/h)
Control via	Manual selector on the central drum
Compatible with	Misuro B+ (speed and cadence) My E-Training (estimated power)
Also compatible (with external power sensors)	Zwift, MyWhoosh, Rouvy, Kinomap and others
Bike compatibility	Road, Gravel, Mountain, and City bikes. The front roller adjusts across 11 positions to fit frames with a wheelbase between 944 mm and 1124 mm.
Connection indicator	No
Firmware update available WiFi	No
Includes	1 month free subscription to My E-Training software & app

Specifications

Power supply data	No power supply
Open size (L x W x H)	500 x 1400 x 130 mm / 20,47" x 55,11" x 6,30"
Closed (L x W x H)	530 x 730 x 250 mm / 20,47" x 17,22" x 11,82"
Weight	7,8 kg / 17,20 lbs
Max Load	110 kg / 242,50 lbs
