

Arion

Arion

Lightweight, stable, essential.
A roller made for warm-ups or agility drills.

Train anywhere

Parabolic rollers for better balance

Lightweight, compact, and foldable

Arion is a **classic roller**—**stable** and **lightweight**—perfect for warm-ups and agility work.

The **parabolic rollers** guide your line naturally, the **lightweight frame** folds easily, and the robust structure makes it suitable even for more **intense sessions**. Compatible with **road, gravel, and MTB**, **Arion** is designed to be **ready to use** in just a few simple steps.

Arion is the free roller for those who want to train at home or in small spaces while keeping the quality and smoothness of a road pedal stroke. Ideal for **warm-ups, recovery rides, or tougher sessions**, it lets you ride with any bike without worrying about weather or outdoor space. Thanks to its ease of use and stability, **Arion** turns every spare moment into a chance to improve your fitness and performance.

The three 85 mm-diameter rollers are precisely balanced to deliver a smooth, realistic **pedal stroke**. Their **parabolic shape** (100 mm at the ends) makes pace control easier, guiding the wheel toward the center and helping you hold your line—even if you're new to rollers.

The antistatic material **reduces noise and tire wear**, while sealed bearings require no maintenance. The integrated step helps you mount and dismount safely—a small but valuable detail that improves everyday usability.

Arion is designed to fit easily into your daily training routine.

Its structure is **lightweight, stable** and **foldable**, so it can be set up in just a few moments, used even in small spaces and stored away without taking up room. The **integrated handles** make it easier to carry, while the practical built-in step helps you get on and off the bike with greater confidence and natural ease.

The natural feel of riding your bike

With **Arion**, indoor training becomes **simple, immediate** and **closer to the real feel of pedalling**.

The bike's free movement helps you stay focused while naturally working on **balance, rhythm** and **control**. Perfect for **agility sessions**, warm-ups or **maintenance training**, **Arion** is designed for riders who want to train at home without losing the dynamic feel of the road.

It can also transmit training data

Arion is designed to deliver the **free, natural pedalling feel** typical of classic rollers, but it can also become a more complete tool for monitoring your indoor training.

With the optional **Misuro B+ sensor**, the roller can transmit the main session data, such as **speed** and **cadence**, to **My E-Training** and to leading indoor training apps such as **Zwift, MyWhoosh, Rouvy** and **Kinomap**, via **ANT+™** and **Bluetooth Smart®** protocols.

This allows you to follow your workout progress directly on the app, record your data and build more structured training sessions. By using the **My E-Training** app, you can also access **power data** during your workout, with no additional sensors required other than the **Misuro B+** sensor.

When you purchase **Arion**, you receive a **1-month free subscription to the My E-Training app**.

Features

Home Trainer Type	Magnetic roller
Power Meter	220 Watt (20km/h) - 520 Watt (40km/h)
Compatible with	Misuro B+ (speed and cadence) My E-Training (estimated power)
Also compatible (with Misuro B+)	Zwift, MyWhoosh, Rouvy, Kinomap and others
Bike compatibility	Road, Gravel, Mountain, and City bikes. The front roller adjusts across 10 positions to fit frames with a wheelbase between 944 mm and 1124 mm.
Connection indicator	No
Firmware update available WiFi	No
Includes	1 month free subscription to My E-Training software & app

Specifications

Power supply data	No power supply
Open size (L x W x H)	500 x 1400 x 130 mm / 20,47" x 55,11" x 6,30"
Closed (L x W x H)	530 x 730 x 250 mm / 20,47" x 17,22" x 11,82"
Weight	7,8 kg / 17,20 lbs
Max Load	110 kg / 242,50 lbs
