

TECHNICAL DATA

- Diameter: 74 mm / 2,91"
- Height: 140 mm / 5,51"
- Weight: 34 g / 0,075 lbs (±10%)

MATERIALS

- Made from bio-based polyamide derived from castor oil.
- Amount of plant-based material: 43.4%.

FEATURES

Elite's latest addition to the range is the **Cannibal XC** cage, crafted using **bio-plastics derived from castor beans**.

Our objective is to develop a production model for our cages that prioritizes sustainability by utilizing renewable sources. The **Cannibal XC** cage, derived from bio-based materials, predominantly utilizes a sustainable polymer sourced from castor beans instead of relying on industrial fossil fuels. This innovative approach **reduces our dependence on fossil resources** while maintaining the same level of impact resistance.

This cage is **reinforced with fiberglass construction** for durability and wraps completely around the bottle for security

with an elastomer section to allow the cage to automatically **adjust for different bottle shapes**.

With its **huge entry point** that allows the insertion of bottles at a wide variety of angles, this cage becomes a convenient and practical solution for riders on mountain bikes or gravel bikes, ensuring easy access to hydration even when space is tight on the tube.

A MORE SUSTAINABLE PRODUCTION MODEL

Business need to acknowledge their responsibilities when it comes to global pollution, and Elite wants to act accordingly. We have decided early on to do everything in our power to **reduce our ecological and carbon footprint**. We are excited to start new strategies to provide our customers with more ecological friendly products and raw materials of excellent quality for resistance and durability. Elite's **Cannibal XC** is made from **more than 43% of bio-based plastics** that are sourced from renewable sources, particularly **castor oil**. We decided to make use of bioplastics and biomass feedstocks for production as a more circular solution to conventional plastics made from petrol.

ALLOWS INSERTION AT A WIDE VARIETY OF ANGLES

With compact road geometry, suspension hardware or bikepacking kit all competing for

space on modern bikes, the **Cannibal XC** is ideal for making the most of your loadout with its huge entry point that allows the **insertion of bottles at a wide variety of angles**. This is a smart way to minimise the space required for carrying a bottle even during the most intense riding efforts.

AUTOMATICALLY ADJUST FOR DIFFERENT SHAPES

The bottle cage's structure wraps completely around the bottle for security with an **elastomer section** to allow the cage to automatically adjust for different bottle shapes.

SECURE BOTTLE RETENTION

The new design features a front structure made to fully embrace the bottle and **improve bottle retention** even in challenging conditions, such as **high-speed descents, rough terrains or off-road paths**.

TESTED AND DEVELOPED WITH THE WORLD'S BEST TEAMS

We're proud sponsors of many **WorldTour, Pro and Continental teams** who help us design, test and create our products so we can meet the needs and expectations of the greatest champions worldwide.
