

Jet Sugar Cane

Jet Sugar Cane

TECHNICAL SPECIFICATIONS

Capacity: 550 ml / 20 oz
750 ml / 26 oz
950 ml / 32 oz

Diameter: 74 mm / 2,91"

Height: (550 ml) 204 mm / 8,03"
(750 ml) 241 mm / 9,49"
(950 ml) 275 mm / 10,83"

Weight: (550 ml) 72,0 g / 0,16 lbs
(750 ml) 82,0 g / 0,18 lbs
(950 ml) 93,0 g / 0,20 lbs

Maximum liquid temperature 40°C / 104° F.

MATERIALS

Bottle body:
bio-based polyethylene (LLDPE/LDPE)
Cap:
bio-based HDPE
Valve:
TPE with bio-based content (ASTM D6866)

Jet Sugar Cane is the sports bottle made from **sugarcane-based bioplastic**.

Born from **renewable sources**, it performs like a race bottle and slots naturally into your riding with **light weight and a smooth, generous flow**.

Designed for riders who care about materials as much as performance, this bottle is **built to last, to perform, and to follow you on every ride**.

A bio-based bottle

Over 94% of the plastic used to make **Jet Sugar Cane** comes from **plant-derived ethanol**, specifically from **sugarcane processing**. That means the raw material does not come from fossil sources.

Mechanical performance stays the same as standard plastic, but the CO₂ footprint of production does not. The result is a high-performance bottle with reduced environmental impact from the very first step of the supply chain.

Fast, consistent flow

The **ergonomic profile** and balanced material flexibility make the bottle easy to grip and squeeze—even on the move or on technical sections.

The valve is the same used on Fly, the most widely used bottle in pro cycling: a light **squeeze delivers a rapid, abundant flow** even under strain. The wide mouth helps with filling and cleaning.

Perfect for on-bike use

Jet Sugar Cane is engineered for cycling with the same geometries, diameters and use parameters that made Elite's sports bottles iconic—even among professionals.

It is compatible **with all 74 mm cages** and features an **easily squeezable body for a high, steady flow**, staying stable in the cage and optimized for quick grabs while you ride.

Also for MTB and gravel

For dirt, dusty environments or exposed conditions, **Jet Sugar Cane** is available as **Jet Sugar Cane Plus with a protective cap**.

The cap fully covers the valve, reducing exposure to mud, dust and debris during off-road riding on mountain bikes or gravel.

Jet Sugar Cane Plus is available in the **550 ml size**.

Safe for you and for the environment

Jet Sugar Cane complies with CE and FDA regulations for **food-contact materials**. It is completely **BPA free** and can be disposed of in **plastic recycling**.

All components separate for complete cleaning and easy, quick maintenance.

Washes well, dries fast

The bottle opening is 20% wider than standard, making **everyday hand-washing easier and simplifying filling with drink mixes or powders**.

Cap and valve components **fully disassemble for thorough cleaning and quick drying**—two essentials for a long product life.

With extra protection if you need it

For off-road riding or harsher conditions, **Jet Sugar Cane** is also available as **Jet Sugar Cane Plus with a screw-on protective cap** that shields the valve from dust, mud and debris.

The cap is available for the 550 ml version.

Recyclability

Originally biological, the material derived from the processing of sugar cane for the production of these bottles is plastic just like traditional plastic, therefore **100% recyclable in regular plastic recycling collection**.
