

## TECHNICAL SPECIFICATIONS

- Internal diameter: 74 mm / 2,91"
- Height: 140 mm / 5,51"
- Weight: 13 g / 0,029 lbs

## MATERIALS

- PA + Carbon fiber.

## FEATURES

### LIGHTNESS TAKES ON A NEW SHAPE

The new **Leggero Carbon** is Elite's iconic **carbon-reinforced bottle cage**, now with a more streamlined structure and an even lower weight: **just 13 grams**. A classic from Elite, redesigned to combine **clean lines, structural precision and all-terrain durability**.

Designed for those who pay attention to every detail on the bike—like the WorldTour teams who choose it daily for their races.

### MINIMAL WEIGHT, SMART STRUCTURE

With only **13 grams**, **Leggero Carbon** redefines the standard for **high-performance carbon-reinforced bottle cages**. Its lightness is the result of detailed work on **geometry, wall thicknesses and force distribution** across passive areas and stress zones. This makes it possible to reduce material without compromising **stability or grip**. A precise technical solution for perfect balance between **weight, strength and structural clarity**, even under demanding conditions.

### SOLID GRIP, EVEN WHEN THE ROAD GETS ROUGH

The profile of **Leggero Carbon** is designed to securely hold **74 mm water bottles**, ensuring a firm grip even on **rough terrain, fast descents or off-road sections**.

Its body is shaped to minimise **micro-movements**, without limiting access.

**Insertion and removal** are fast and fluid, delivering an ideal balance between **control and ease of use**.

### CARBON REINFORCEMENT THAT MAKES THE DIFFERENCE—ON AND OFF THE ROAD

**Leggero Carbon** is a clear example of **function-first design**. Whether on long road rides or technical gravel routes, it always delivers **grip and responsiveness**.

The **carbon reinforcement** ensures maximum lightness in a **compact structure** ideal for road bikes, while targeted strength in critical areas provides **optimal performance on rough terrain, under vibration and in gravel segments**. One bottle cage, built for different ways of riding.

### PRECISION IN EVERY DETAIL

Every **Leggero Carbon** is the result of a process that blends **advanced production technologies** with **skilled craftsmanship**. After the carbon shaping phase, each **bottle cage is manually finished and checked** by expert technicians. This dual process—**industrial and manual**—ensures **dimensional accuracy, strength and attention to detail**, as expected from a product made for high-performance use.

### CHOSEN BY THOSE WHO RACE TO WIN

**Leggero Carbon** is the bottle cage **used by the highest number of WorldTour teams**. Its **ultra-low weight, solid retention and reliable performance** make it a trusted component for riders racing at the highest level, from training to the toughest race conditions.
