

ELITE**JET PLUS**

elite-it.com

TECHNICAL SPECIFICATIONS

- Capacity: 550 ml / 20 oz
750 ml / 26 oz
950 ml / 32 oz
- Diameter: 74 mm / 2,91"
- Height: (550 ml) 208 mm / 8,19"
(750 ml) 245 mm / 9,65"
(950 ml) 279 mm / 10,99"
- Weight: (550 ml) 86 g / 0,19 lbs
(750 ml) 96 g / 0,21 lbs
(950 ml) 107 g / 0,23 lbs
- Maximum liquid temperature 40°C / 104°F.

MATERIALS

- Bottle body: PE.
- Cap: PP.
- Valve: TPE + PP.
- Protective cap: PP.

FEATURES

Available in 3 sizes (550 ml, 750 ml, and 950 ml), the **Jet Plus** is the version with a **protective cap** of Elite's water bottle series, made with an additive that allows, under controlled conditions, a **faster plastic degradation process** compared to standard.

Thanks to the cap **protecting the spout from mud, dust, and debris**, it is perfect for your outings in nature on **mountain bikes or gravel bikes**.

AN ECO-DESIGN ALTERNATIVE FOR YOUR HYDRATION

The development of **more sustainable alternatives** to products like sports bottles, which already represent a more eco-friendly option compared to the classic disposable bottle, has become an increasingly pressing need in light of greater awareness about plastic use and its environmental impact.

The **Jet Plus** water bottle aims to meet this requirement as it is capable of reducing its decomposition time when disposed of in **regular industrial composting streams**, positioning itself as one of the most promising alternatives to traditional plastic water bottles. The plastic material used to make the **Jet Plus** is treated with a **special additive** that allows microorganisms responsible for material degradation to attack the polymer chain of the plastic used.

PRACTICAL, WITH A PROTECTIVE CAP

The main difference between the **Jet** and the **Jet Plus** is that the latter includes a **practical protective cap** to shield the nozzle from mud, dust, and other external agents that may

accumulate on the valve during use. Perfect for ensuring **maximum safety and hygiene even on gravel and mountain bike trails**.

A LIGHTWEIGHT, SPORTY, AND ELEGANT DESIGN

The water bottle features a new **sophisticated, sporty, and functional design** that has allowed us to make the bottle body more durable while maintaining its lightweight and softness. We have also managed to **reduce the amount of material used to produce each bottle by 7%**, which is an excellent result for such a lightweight bottle.

Distinguished by a sleek and elegant profile, the **Jet** consists of a bottle body shaped with a smaller diameter to **facilitate grip** even in difficult conditions, **facilitate on-the-go extraction**, and ensure **greater stability** of the product in the bottle cage. With a **standard diameter of 74 mm** (66ml for the 350ml version), the **Jet** can be used with all traditional bottle cages available on the market.

A QUICK AND ABUNDANT LIQUID FLOW

The **Jet** water bottle features the trademark Elite cap equipped with an innovative push-pull valve that not only makes it easier to open and close during the ride but is also designed to provide a **faster and more abundant flow of water** at any time.

The quick unscrewing opening makes **washing and drying the bottle easier**.

FOOD SAFETY

All our water bottles are made from **FDA-approved materials** and comply with **European CE regulations** governing materials intended for food contact.

BPA FREE

The components of the water bottle are completely **free of BPA (Bisphenol A)**.

RECYCLABILITY

The materials used are **recyclable** through standard recycling streams.
