

TECHNICAL SPECIFICATIONS

- Capacity: 350 ml / 12 oz
550 ml / 20 oz
750 ml / 26 oz
950 ml / 32 oz
- Diameter: 74 mm / 2,91"
(350ml) 66 mm / 2,60"
- Height: (350 ml) 164 mm / 6,46"
(550 ml) 204 mm / 8,03"
(750 ml) 241 mm / 9,49"
(950 ml) 275 mm / 10,83"
- Weight: (350 ml) 55,0 g / 0,12 lbs
(550 ml) 72,0 g / 0,16 lbs
(750 ml) 82,0 g / 0,18 lbs
(950 ml) 93,0 g / 0,20 lbs
- Maximum liquid temperature 40°C / 104°F.

MATERIALS

- Bottle body: PE.
- Cap: PP.
- Valve: TPE + PP.

FEATURES

The range of cycling water bottles from Elite includes the iconic **Jet**, one of the first **eco-design projects** undertaken by Elite to reduce the impact of our production. The **Jet** is made with an **additive** that allows for a faster plastic degradation process under controlled conditions

compared to the standard.

Available in **4 sizes** to suit any cycling hydration need (350 ml, 550 ml, 750 ml, and 950 ml), the **Jet** combines the best performance qualities from Elite's water bottle catalog such as **lightweight, ample dispensing, and maintaining a clean water taste**, while also integrating the use of **more eco-conscious plastic material** to limit the bottle's impact on the environment.

AN ECO-DESIGN ALTERNATIVE FOR YOUR HYDRATION

The development of **more sustainable alternatives** to products like sports bottles, which already represent a more eco-friendly option compared to the classic disposable bottle, has become an increasingly pressing need in light of greater awareness about plastic use and its environmental impact. The **Jet** water bottle aims to meet this requirement as it is capable of reducing its decomposition time when disposed of in **regular industrial composting streams**, positioning itself as one of the most promising alternatives to traditional plastic water bottles. The plastic material used to make the **Jet** is treated with a **special additive** that allows microorganisms responsible for material degradation to attack the polymer chain of the plastic used.

A LIGHTWEIGHT, SPORTY, AND ELEGANT DESIGN

The water bottle features a new **sophisticated, sporty, and functional design** that has allowed us to make the bottle body more durable while maintaining its lightweight and softness. We have also managed to **reduce the amount of material used to produce each bottle by 7%**, which is an excellent result for such a lightweight bottle. Distinguished by a sleek and elegant profile, the **Jet** consists of a bottle body shaped with a smaller diameter to **facilitate grip** even in difficult conditions, **facilitate on-the-go extraction**, and ensure **greater stability** of the product in the bottle cage. With a **standard diameter of 74 mm** (66ml for the 350ml version), the **Jet** can be used with all traditional bottle cages available on the market.

A QUICK AND ABUNDANT LIQUID FLOW

The **Jet** water bottle features the trademark Elite cap equipped with an innovative push-pull valve that not only makes it easier to open and close during the ride but is also designed to provide a **faster and more abundant flow of water** at any time. The quick unscrewing opening makes **washing and drying the bottle easier**.

FOOD SAFETY

All our water bottles are made from **FDA-**

ELITE

JET

elite-it.com

approved materials and comply with **European CE regulations** governing materials intended for food contact.

BPA FREE

The components of the water bottle are completely **free of BPA (Bisphenol A)**.

RECYCLABILITY

The materials used are **recyclable** through standard recycling streams.
