# QUBO FLUID

elite-it.com

## CHARACTERISTICS OF FRAME

### QUBO FRAME

The cutting-edge design combines the **strength of steel with the hi-tech benefits of modern plastics.**

Includes the **exclusive Crono Compass System** which realistically simulates road riding (weight/power).

### SAFE AND STABLE

Stability has been considerably improved compared to previous versions, thanks to a wider resting surface and to the optimization of the bicycle+rider center-of-mass in relation to the frame.

This offers safe training conditions even at high speeds or under maximum effort.

### FULL COMPATIBILITY WITH BICYCLES

The new frame model has been designed to ensure full compatibility with the most modern bicycles available on the market, and it can be **adapted to all types of wheels with diameters between 20" and 29"**.

### FAST FIXING SYSTEM.

By acting on a **handy lever**, it is possible to **clamp or release the bicycle** just with one operation.

During the first use of the frame the **fixing pin must be adjusted** in order to ensure correct

functioning of the fast fixing mechanism. All operations are carried out on one side only, making them easy and fast.

## RESISTANCE UNIT TECHNICAL DATA

### FLUID TECHNOLOGY

New Fluid type Resistance Unit where a large flywheel completely immersed in oil allows high resistance levels to be obtained even at low speeds.

The power obtainable has been **increased by 100% compared to the previous model.**

Resistance varies automatically according to the speed, therefore high gears can be used for power work and low gears for agility work.

### NEW DESIGN

The **new large aluminum shells** together with the large finned areas ensure **optimum heat exchange between the resistance unit and the air**, with subsequent lowering of the working temperature.

### ELASTOGEL ROLLER

Elastogel roller with increased diameter of 45 mm, compared to the common 30mm of all other rollers, offering better grip on the tyre, a **33% reduction in the number** of turns with subsequent reduction of noise by more than 50%, as well as increasing the product's service life.

## FEATURES

HOME TRAINER TYPE	Traditional home trainer with fluid resistance
MAX POWER	145 Watt (20km/h) - 540 Watt (40km/h)
COMPATIBLE WITH	My E-Training software & app Zwift, Trainer Road, Kinomap and more (by using the Misuro B+ sensor)
FLYWHEEL	1,7 kg
BIKE COMPATIBILITY	Road, Gravel, Mountain and city bikes.  Included adapters for: Quick release Ø 5x130-135  Adapters available* for: Thru-axle Ø 12x142 (cod. 1020008) Thru-axle Ø 10x135-12x135 (cod. 1020008) Specialized SCS Ø 12x135 (cod. 1020008) Boost Ø 12x148** (cod. 1020008)

\*available on [www.shopelite-it.com](http://www.shopelite-it.com)

\*\*maximum outer width of the rear stay and fork groupset of the bike: 188 mm / 7.40 inches.

INCLUDES 1 month free subscription to My E-Training software & app

## SPECIFICATIONS

POWER SUPPLY DATA	No power supply
OPEN SIZE (L x W x H)	590 x 570 x 450 mm / 23,33" x 22,44" x 17,71"
CLOSED (L x W x H)	550 x 570 x 300 mm / 21,65" x 22,44" x 11,82"
WEIGHT	9,6 kg / 21,16 lbs
MAX LOAD	110 kg / 242,50 lbs
